

Imperial Fireplace Mantels Install Tips

We recommend using professionals to install the mantel
StoneMold is fragile - handle with care

1) Hearth is hollow and requires plywood support or wood blocks underneath to hold weight supplied by others

Hearth seen above is upside down showing hollow cavity

- 2) Place the hearth in position
- 3) Mantel Top: Screw a 2x4 to the wall directly into the wall studs. Apply construction adhesive to the 2x4 and underneath the mantel top.
- 4) Place the legs in position. The mantel top will be supported by the 2x4 and the legs
- 5) Filler kit is included to fill joins and seams
- 6) Apply stone sealer supplied by others to the mantel to avoid staining

Final product appearance may vary from this brochure. Request samples. All are natural products and there can be finish per batch or texture variances per product.
